

KIM GABBERT

SOFTWARE ENGINEER

Coming from an accounting and implementations background, my previous roles allowed me to research and help customers select the best software that met their needs. This thirst for knowledge and passion for solving problems led me to start a new career in Software Development, giving me the ability to design real-world applications with customers in mind. With five years of professional experience, working in various environments from start-ups to large corporations, I am ready to help a team achieve their goals while expanding my knowledge and skill sets to build a long-term career.

Experiences

SOFTWARE ENGINEERING FELLOW

Oct '21 - Jan '22

General Assembly

- Achieved 400+ hours of hands-on training in full-stack web development.
